

CARLI HORSE MIX FEED

Description:

Carli Horse Mix Feed is a complete feed composed by selected forage chaff and grains.

In terms of feed efficiency Carli Horse Mix Feed brings the necessary protein, highly digestible fiber and sugar, minerals and vitamins, fundamental for a balanced horses' diet.

Components

Alfalfa pellet, barley, corn, carobs, oat.

Product safety and hygiene

The HACCP system allows a complete traceability of the product over the whole production process. Specific attention is paid during the entire production process against foreign bodies contamination.

Packaging:

In bulk

Jumbo Bags (approximately 500/1000/1500 kgs)

In Bags (20/25 kgs) placed on pallets

Recommendations:

We recommend providing horses a free access to regular supply of clean fresh water and plain white table salt. When supplementing the diet of horses with vitamin and mineral complexes, prebiotics, probiotics and other nutritional supplements, an expert veterinary nutritionist should be always consulted.

Benefits

- Product's main application is in the diet of horses and other equids when the use of feeders is preferred.
- Its high cellulose content ensures a healthier microbial population of the equine hindgut and the overall well-being of the digestive tract.
- Carli Horse Mix Feed is very appreciated by horses and can be used as a medium (carrier) for powder or liquid supplements or drugs.
